Water Risk Monetizer: A Financial Modelling Tool

|

Description / Abstract

The Water Risk Monetizer is a financial modeling tool that provides a new way for businesses to factor water scarcity into decisions that support business growth and help ensure the availability of fresh water for future generations. Developed by Ecolab in partnership with Trucost and Microsoft, the Water Risk Monetizer provides actionable information to help businesses understand water-related risks and quantify risks in financial terms to inform responsible decisions that enable growth. The Water Risk Monetizer is globally relevant, simple to use and applicable across a wide range of businesses and industries.
