

RESOURCE

NBI Gender Mainstreaming Policy and Strategy

|

Description / Abstract

The Policy and Strategy are intended to establish an enabling environment that will foster specific strategies for changing the gender patterns in the Nile Basin Initiative activities that are aimed at tackling poverty reduction issues, promoting the wellbeing of everyone in the NBI. The Policy and Strategy are tagged to a basic process that involves working with partners to:

- Prepare an assessment that analyzes the gender vi NBI Gender Mainstreaming Policy and Strategy dimensions of development and identify gender responsive priority actions, which the programs and projects could address in the short and medium term,
- Develop and implement priority operational interventions that respond to the proposed needs assessment analysis to be carried out,
- Monitor the implementation activities and results of interventions and feed back to the subsequent planning processes
