

Key Performance Indicators of River Basin Organizations

Author(s)

Hooper, Bruce P.

Description / Abstract

This report discusses the results of a study undertaken in a Universities Council on Water Resources Fellowship with the Institute for Water Resources, US Army Corps of Engineers to measure the effectiveness of river basin organizations. The aims of the study were to:

- Develop general performance indicators of river basin management organizations' ability to undertake integrated river basin management (IRBM) which is taken to mean implementing integrated water resources management at the basin scale, and
- Apply the general indicators to selected US river basins and recommend their application there and elsewhere.
