

Implementing the source-to-sea approach

Author(s)

Mathews, Ruth E. Tengberg, Anna Sjödin, Johanna Lymer, Birgitta Liss

Description / Abstract

This guide presents practical steps for the design and implementation of projects that can improve the management of land, freshwater, delta, estuary, coast, nearshore and ocean environments.

The source-to-sea approach directly addresses the linkages between land, water, delta, estuary, coast, nearshore and ocean ecosystems in support of holistic natural resources management and economic development.
