System of Environmental Economic Accounting for Water (SEEA-Water)

|

Description / Abstract

To support implementation of environmental-economic accounts, the System of Environmental-Economic Accounts for Water (SEEA-Water), a SEEA sub-system, provides compilers and analysts with agreed concepts, definitions, classifications, tables, and accounts for water and water-related emission accounts. SEEA-Water is fully coherent with the broader SEEA. It elaborates and expands the guidance on accounting in the International Recommendations for Water Statistics (IRWS). UNSD coordinated the preparation of SEEA-Water in collaboration with the London Group on Environmental Accounting.
