Brokering Development: Enabling Factors for Public-Private-Producer Partnerships in Agricultural Value Chains. Summary of Indonesia case study

|

Author(s)

Natawidjaja, Ronnie S Harahap, Haris F Perkasa, Henri W

Description / Abstract

This is a summary of the Indonesia Country Report, which was written by Ronnie S Natawidjaja, Haris F Harahap and Henri W Perkasa, of the Center for Agrifood Policy and Agribusiness Studies, Padjadjaran University, Bandung. It is based on research carried out in 2014 in association with the Institute of Development Studies (IDS), as part of an IFAD-funded programme on the role of PPPs in agriculture. It is one of the four IFAD project-supported Public-Private-Producer Partnerships analysed for the research report 'Brokering Development: Enabling Factors for Public-Private-Producer Partnerships in Agricultural Value Chains'. The report synthesises the four case studies and discuss the findings on how PPPs in agricultural value chains can be designed and implemented to achieve more sustained increases in income for smallholder farmers and broader rural development.
