

RESOURCE

Social Aspects and Stakeholder Involvement in Integrated Flood Management

|

Description / Abstract

This publication forms part of the Flood Management Policy Series published within the framework of the WMO/GWP Associated Programme on Flood Management. The series comprises publications on various aspects of flood management policy, including economic, environmental, legal and institutional, and social aspects. The series as such supplements an in-depth perspective to the “Integrated Flood Management Concept Paper” (APFM 2003). The series is based on expert groups formed for each publication to guide and advise the preparation process, and on a wide review and consultation process in the framework of conferences and direct correspondence with leading sector professionals in the area of natural resource management and development policy.
