Description

Tools for Development draws together a range of techniques designed to help DFID officers and others undertake development activities and interventions of any size and kind. This is a manual from which to pick and choose: you may need to employ different skills at different times or several skills at the same time. Some are more likely to be employed at the outset, or in the design stage. Some skills may be employed once; others will need to be revisited and may be revised as the activity or intervention continues. And the skills and techniques you start out with may need to be added to as you progress. This document began life as an attempt to draw together many people’s years of experience undertaking development activity.
